Pixel Art

Article by: Emma Morrison, 4th

In Mrs. Masterson's we are learning how to make Pixel Art. It looks easy, but you have to make sure that you are putting everything in the right place. If you have done Stop Motion Videos it kinda looks like that, but on a computer. Pixel Art is really cool if you know what you are doing and what you are drawing.

Wavelength & Amplitude

Article by: Lillian Piotrowski, 4th.

In Ms. Winters class we are learning about wavelength and amplitude. Wavelength is where how wide a line is. Amplitude is how tall the wave is.

Stop Motion Videos

Article by: Maya Lopez, 4th grade

In Mrs. Masterson's class we were working on stop motion videos. First you take a background and Legos as your characters. Then take about 100 photos of your characters moving. Edit the movie with background music or sounds. And then you are done.

March is Reading Month

Article by: Sophie Otremba, 5th

Photo by: Sophie Otremba, 5th

Fifth graders worked hard on these bookmarks by using our Google drawing program and using pictures. We wanted to inspire second graders to read more. So part of March Is Reading month we wanted to give these to a second grade class.

I Spy Art Exhibit

Article by: River Vito, 5th grade

It's time for I Spy Art Exhibits to be made! In these fun student made crafts you can look for animals, people, or items. In this photo you can see some students working hard on the project. Have you found anything in the exhibits? We hope so!

Explorers Journal

Article by: Namara Smith, 5th

In social studies we were working on a project to where you have to create a journal about an explorer. The explorer is assigned and you have to write letters, want/adds and more. Learn about the past.
