Terrarium Project

Article by: Madison Hirschfelt, 5

In Mrs. Shirkey's 5th grade class the students are making their own terrarium and get to grow grass in it. If you walk along the 5th grade hallway you will see some terrariums that students left for you to see.

Eat This Not That

Article by: Shelby Bergquist and Hannah Moore, 5th graders

Photo by: Shelby Bergquist, 5th

Do you always have to be asked to eat your veggies? Well ask no longer! No more veggies, you don't always have to order salad to eat healthy! Gasp! If you want to eat healthy come take a look at our posters! Say goodbye to eating Doritos on the couch and say hi to a lean mean healthy eating machine!

Newton's Laws of Motion

Article by: Seth Gutierrez, 4th

Photo by: Seth Gutierrez, 4th gr.

In fourth grade in science we are learning Newton's Law of Motion. First we need a piece of cardboard, then a car, and then a penny and a block. After we put the penny on top of the car, it rolls down the cardboard the car hits the block and stops and the penny flies forward. That is what we are doing in fourth grade.

Catapults

Article by: Emma Morrison, 4th gr

In fourth grade we are making catapults. How they work is that you only get certain objects like twelve rubber bands, 12 sticks, tape, and a spoon. You use those objects and build a catapult that flings a cotton ball across the room.

Electricity Circuit

Article by: Emma Morrison, 4th

In fourth grade we are making electricity. How it works is you take your battery because all the energy that we need is inside of it. Then we need to get the cords and connect it to the battery by putting it at the top and the bottom. Then take the light bulb and connect it to the side and the bottom and your light bulb will come on if you have a complete circuit.

Read

Article by: Avery Lopez, 5th

Need gifts for your family? Read some books and go to Book Adventure. Mrs. Masterson's classroom has many holiday gifts. Like puzzles, books, and stuffed animals. So... read some books!
