Math Class

Article by: Lillian Piotrowski, 4th

In math class we are learning how to estimate. For 250 you have to estimate to 300. Mrs. Bergquest says four or less give it a rest, five or more raise the score.

Energy

Article by: Kasey Gray, 4th

In Ms. Winter's class we are learning about energy. We did a science project. My group put a penny on a binder and the penny slid off the binder. We gave the penny energy. When the penny slid off the penny went fast. Below is another example of energy.

Internet Safety

Article by: Kylie Gallahar, 4th

Photo by: Kylie Gallahar, 4th

It is important to be safe online. Here are some tips to help you do that. Never share your phone number, a picture of yourself, your address, your real name, or your school name online.

Hoop Glider

Article by Ashton Smith, 5th

Photo by: Ashton Smith, 5th

In Mrs. Shirkey's science class we made hoop gliders. You cut three strips of paper and a straw. Tape the straw to the paper, there you go. Kameron Kubik won first place for the Hoop Glider. He got the farthest throw out of the final 4 people.

Native Americans

Article by: Sophie Otremba, 5th

In Ms. Mcmillan's class we are learning about native tribes. They are very cool to learn about. One of the tribes are the Hohokum. The Hohokum live in the southern part of Mexico.

How to Subtract

Article by: Isabel Checks, 4th

First you need to have a problem and then look at the problem. If the little number is on top then you need to borrow from your friend and add those numbers up. If it is over nine the you need to add the number you got from the second number and then you can subtract.
